Experience

RabbitSam Github

Web Developer

VML (formerly Wunderman Thompson)

January 2022 - March 2023

Dhaka, Bangladesh

Created and deployed 1000s of landing pages and EDMs for various Microsoft Events.

- Maintained a high KPI and periodically exceeded expectations.
- Completed tasks in a collaborative, agile environment with regular communications.
- Participated and presented in weekly training sessions meant to ensure everyone was on the same level.

Key Technologies: JavaScript, CSS, HTML

Configura

July 2019 - December 2019

Kuala Lumpur, Malaysia

Application Developer Intern

Created and deployed several gadgets/dashboard items for Jira and increased overall productivity of teams within the company by **20%**.

- Engaged in regular presentations and requirements gathering meetings with clients (who were internal team leads).
- Completed tasks in an agile environment using Scrum Methodology.

Key Technologies: JavaScript (with JQuery), Java.

Projects Rejectionator

August 2023

Personal Project

Live Link

- Website (SPA) that allows recruiters to send a large number of job application rejections in a simple form.
- Created for comedy purposes.
- Project Github

Key Technologies: Next.js, React.js, TypeScript, SCSS, Node.js, Vercel, Figma.

Tazreen Jahan Bari's Website

Client Project

May 2023 - July 2023

Live Link

- Website that allows the client to showcase their blogs, portfolios and work experience.
- The client can create, edit or delete their blogs, different types of publications, research interests and work experience however they see fit.
- Results exceeded client's expectations.

Kanban Board

February 2023 - March 2023

Personal Project
Live Link

- Created a Kanban Board somewhat similar to Trello.
- Users can create, edit and delete the boards, columns in the boards, and tasks in the columns.
- Project Github.

Key Technologies: MERN stack (MongoDB, Express.js, React.js, Node.js), AWS EC2, Redux, Bootstrap.

Portfolio Website

March 2023 - May 2023
